So after seeing you in the elevator, I looked at my calendar and I will not be able to go to Silverton for the 20<sup>th</sup> of June meeting.

**Subject:** RE: Community Update

I think we would do it the same way as last time – ARSG meeting in the afternoon and evening community update meeting.

Seems to me the topics we'd want to cover include, and these would be short presentations:

Analysis of water quality at the gages

Eco risk work

Water quality modeling

Determining the best way to get metal reductions

Red & Bonita exploration

InnoCentive Initiative

Short summary of legal discussions between Sunnyside and EPA/BLM

Peter:

June 20 should work fine for a Community Update.

Are you planning on something like last year with the regular ARSG monthly meeting in the afternoon and an evening community update meeting?

What specifically should we plan on presenting? I believe Dan Wall could speak on the eco risk work, and Rob Runkle could discuss the water modeling.

Mike – I just wanted to check in to see if June still looked like a good month for EPA to do a community update in Silverton, on the 20<sup>th</sup>.
